XR 700 BRUSHGUARD
900-0320

Application: 2022 - Current Xplorer XR 700 EPS/700 LE

Designed specifically for the XR 700, this ARGO-designed front brushguard is made with heavy-duty 1 1/4" steel construction. Easy 4-bolt attachment system makes installation fast and secure. The edge-to-edge, top to bottom protection provides piece of mind for your grill and radiator. High-gloss powder-coated paint provides protection to keep this brushguard looking good.

XR 700 REAR BUMPER
900-0321

Application: 2022 - Current Xplorer XR 700 EPS/700 LE

Designed specifically for the XR 700, this ARGO-designed rear bumper is made with heavy-duty 1 1/4" steel construction. High-gloss powder coated paint provides protection to keep this bumper looking good. Easy 4-bolt attachment system makes installation fast and secure. This rear bumper makes the perfect bookend.

XR 500 REAR BUMPER
900-0312

Application: 2022 - Current Xplorer XR 500/500 SE

The XR 500 rear bumper was designed to hold up to the demands of off-trail riding. Made with heavy-duty 1 1/4" steel construction, easy 4-bolt attachment system and a high-gloss powder-coated paint finish.

XRT FRONT STEEL BUMPER
11521G

Application: 2024 XRT 600 EPS/600 LE
2021-2023 XRT 570/570 LE
2021 XR 500 LE/570 LE
2021 XRT 500 LE

This ARGO-designed front bumper is made with heavy-duty 1 1/4" steel construction and provides edge-to-edge protection. The easy 4-bolt attachment system makes installation fast and secure while the durable powder-coated paint holds up to those off-trail adventures.

XRT REAR STEEL BUMPER
11621G

Application: 2024 XRT 600 EPS/600 LE
2021-2023 XRT 570/570 LE
2021 XRT 500 LE

The XRT rear bumper was designed to hold up to the demands of off-trail riding. Made with heavy-duty 1 1/4" steel construction, easy 4-bolt attachment system and a high-gloss powder-coated paint finish.

**WINDSHIELD WITH MOUNT****XR 500** 900-0309 **XR 700** 900-0317**Application:** 2022-Current Xplorer XR 500, 500 SE, 700 EPS and 700 LE

Leave the dust and bugs behind you with this Argosy-designed mid-height windshield. The easy-on handlebar-mounted design provides air flow deflection for the rider on those long trips or cold days, while the quick detach feature gives you that wind in your face feeling. Superb fit with multiple adjustments makes this windshield a must-have.

**4.5" FRONT RACK EXTENSION****XR 500** 900-0310 **XR 700** 900-0318**Application:** 2022-Current Xplorer XR 500, 500 SE, 700 EPS and 700 LE

Add some style and function to your XR 500 or XR 700 with this 4.5" front rack extension. The 3/4" steel construction and 4-bolt attachment system adds plenty of secure storage for the front of your machine. High-gloss powder-coated finish provides a clean look for years.

**4.5" REAR RACK EXTENSION****XR 500** 900-0311 **XR 700** 900-0319**Application:** 2022-Current Xplorer XR 500, 500 SE, 700 EPS and 700 LE

Maximize your rear rack capacity with this 3/4" steel construction rack extension. High-gloss powder-coated finish provides a clean look while the 4-bolt attachment system provides stability. Custom fit for the Xplorer XR 500 or XR 700.

**STORAGE & TRAILBERABLE COVER****XR 500** 900-0508 **XR 700** 900-0509**Application:** 2022-Current Xplorer XR 500, 500 SE, 700 EPS and 700 LE

Protects your investment from the elements when not in use. Long term or short term this cover will help preserve the interior of your ATV. Custom fit for the Xplorer XR 500 or XR 700.

60" PLOW BLADE ASSEMBLY

11633G

Application: 2021-Current Xplorer XR 500, 500 SE, 500 LE, 570, 570 LE, 700 EPS, and 700 LE
2021-Current Xplorer XRT

Retire that snow shovel forever by adding a plow to your Argo Xplorer ATV. This 60" wide x 15" high plow allows you to maximize your snow removal effort. The heavy gauge steel and 1/4" replacable thick scrape curved blade provides years of pushing and leveling. Anti-stick stamped ribs for blade strength and maintains float.

*Requires pushframe mount and pushframe for installation.

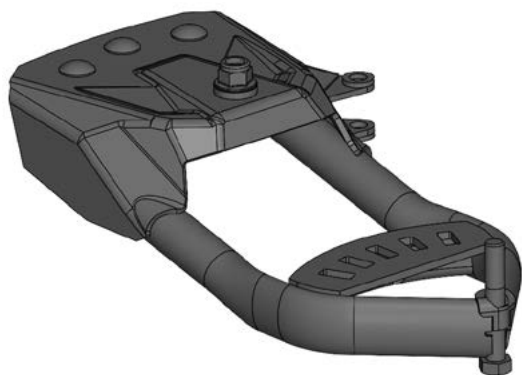

**PLOW PUSH FRAME**

11632G

Application: 2021-Current Xplorer XR 500, 500 SE, 500 LE, 570, 570 LE, 700 EPS, and 700 LE
2021-Current Xplorer XRT

The Argo plow pushframe provides custom directional plowing with 25-degree side-to-side adjustments. Heavy-duty steel construction for durability and powder-coated paint for a maintenance free finish. Allows for easy and fast plow connection.

*Requires pushframe mount for installation.

**PUSH FRAME EXTENSION**

900-0546

Application: 2022 - Current Xplorer XR 500, 500 SE, 700 EPS, 700 LE

The Argo plow pushframe extension provides custom directional plowing with 25-degree side-to-side adjustments. Heavy-duty steel construction for durability and powder-coated paint for a maintenance free finish. Allows for easy and fast plow connection, recommended to be used if a track kit is installed.

*Requires pushframe mount for installation.

**PUSHFRAME MOUNT**

2022 - Current XR 700 900-0327

2021 XR 500, 500 LE 11634G

2021-2022 XR 570, 570 LE 11634G

2021-Current XRT 11634G

Application: 2021-Current Xplorer XR 500, 500 SE, 500 LE, 570, 570 LE, 700 EPS, and 700 LE
2021-Current Xplorer XRT

Plowing snow starts here. The Argo custom-fit pushframe mount is what allows you to connect your pushframe to your ATV. Engineered and tested to optimize the push location on the frame. The low profile allows you to leave on your ATV year round. Built from powder-coated heavy gauge steel, this mount is built to last for years with minimum maintenance.

**TRACK SYSTEM**

XR 500 900-0314

XR 700 900-0323

Application: 2022-Current Xplorer XR 500, 500 SE, 700 EPS, and 700 LE

Argo has over 50 years of experience getting people to places others can't. Part of that has to do with traction. The Argo XR track system distributes weight over 4 tracks providing exceptional handling with friendly and predictable control. The 11.5" front track and 12.5" rear track have engineered radius track edges that are designed to prevent track catch and tip up.

We suggest initial installation to be done by authorized ARGO dealer to assure proper installation and setup. Reinstallation is less of an ordeal and could be completed in a couple of hours for those who possess some mechanical aptitude.
